Gutter profile, fascia and downpipe options

BOX GUTTER 125MM

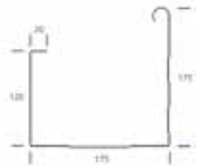

Metalcraft Roofing's traditional 125mm Box Gutter is another popular rainwater system solution that is predominantly used in residential applications. With clean, bold lines and a high face Box Gutter 125mm conceals the sheet ends at the eave line and looks great with profiled Longrun sheeting or Tile roofing. Internal and external brackets are available in this profile and it is suitable for use with Metalline Fascia. Box Gutter 125mm is manufactured in Auckland and Palmerston North and is available for purchase from all Metalcraft Roofing branch locations.

BOX GUTTER 175MM

Box Gutter 175mm is a popular rainwater system solution that can be used in either commercial or residential applications. It is able to handle larger volumes of water, and is easy to clean out if required. Box Gutter 175mm can be fixed either with internal or external brackets.

Box Gutter 175mm is manufactured in Auckland and is available for purchase from all Metalcraft Roofing branch locations.

BOX GUTTER 300MM

Box Gutter 300mm is a rainwater system that provides excellent water discharge capacity for commercial projects. It is able to handle larger volumes of water, and is easy to clean out if required. Box Gutter 300mm is fixed with external brackets

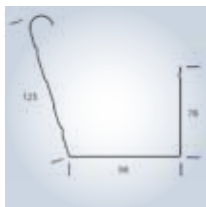

Box Gutter 300mm is manufactured in Auckland and is available for purchase from all Metalcraft Roofing branch locations.

SQUARELINE

Squareline is a popular rainwater system solution with the clean, bold lines of traditional box gutter but with more modest dimensions, it has become popular for use in residential applications. Optional overflow slots prevent water spilling over the back of the gutter should blockage occur. Squareline looks great with profiled Longrun sheeting or Tile roofing.

Squareline Gutter is manufactured in Christchurch and is available for purchase from all Metalcraft Roofing branch locations.

HILINE

Hiline Gutter is a stylish alternative to the standard box gutter profile. The high sloping front face hides sheet ends and creates a feature at the eave line. Suitable for use on Metalline Fascia, Hiline Gutter looks great with profiled Longrun sheeting or Tile roofing. Hiline Gutter is manufactured in Hamilton and is available for purchase from all Metalcraft Roofing branch locations.

COLOURS AVAILABLE:

The Rainwater Systems in this brochure are available in Zinalume, Colorsteel Endura and Colorsteel Maxx. Before you make your final colour selection actual colour samples are available from you local Metalcraft Roofing branch. Phone 0800 ROOFNZ to request a colour chart.

Gutter profile, fascia and downpipe options

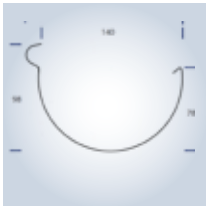

METALLINE QUAD GUTTER

Metalline Quad Gutter is our most popular residential profile. Whether you are renovating or involved in a new build, this profile will enhance the appearance of your home. The Metalline system uses concealed brackets and is compatible with Metalcraft Roofing Metalline Fascia or timber fascia. Metalline Quad Gutter is available with overflow slots to prevent flooding from blockages, and snow straps are stocked to suit this profile if required. Metalline Quad Gutter is manufactured in Auckland and Christchurch and is available for purchase from all Metalcraft Roofing branch locations.

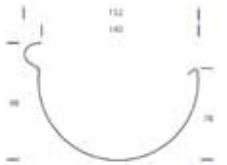

METALLINE FASCIA 185

Metalline Fascia 185mm is used on both eave line and gables in conjunction with Metalline Quad Gutter to provide a quality Fascia and Gutter Solution. Metalline Fascia is also compatible with most gutter profiles and looks great with any residential roof finish. Metalline Fascia 185mm is manufactured in Auckland and Christchurch and is available for purchase from all Metalcraft Roofing branch locations.

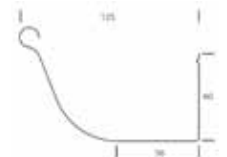

HALF ROUND GUTTER

Half Round Gutter adds class and distinction to the eave line of any dwelling. Half Round Gutter looks great with profiled Longrun or Tile roofing and is available in Zinalume, Galvsteel, Colorsteel Endura and Colorsteel Maxx. Half Round Gutter is manufactured in Christchurch and is available for purchase from all Metalcraft Roofing branch locations.

QUARTER ROUND GUTTER

Quarter Round Gutter is a classic gutter profile that compliments any eave line. Looking good with either profiled Longrun or Metal Tile roofing, Quarter Round Gutter is available in Zinalume, Galvsteel, Colorsteel Endura and Colorsteel Maxx. Quarter Round Gutter is manufactured in Palmerston North and is available for purchase from all Metalcraft Roofing branch locations.

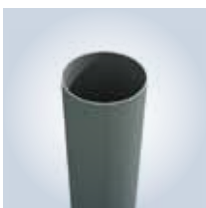

RIBLINE INTERNAL GUTTER & FASCIA

Ribline Fascia is an external fascia with concealed gutter rainwater system. Modern design and technology provides an efficient system of rainwater collection behind an attractive prepainted steel fascia with neat profile lines. Ribline Fascia and Internal Gutter is manufactured in Hamilton and is available for purchase from all Metalcraft Roofing branch locations.

RECTANGULAR DOWNPIPE

Rectangular downpipe is an excellent alternative to the standard round downpipes available and looks great in combination with the Metalcraft Roofing range of box gutters. Rectangular downpipe is 75mm by 55mm and is available in Zinalume, Galvsteel, Colorsteel Endura and Colorsteel Maxx. Rectangular Downpipe is manufactured in Christchurch and is available for purchase from all Metalcraft Roofing branch locations.

ROUND DOWNPIPE

Round Downpipe is available in a range of sizes and looks great in combination with the Metalcraft Roofing range of box gutters. Round Downpipe is available for purchase from all Metalcraft Roofing branch locations.
